DOSES

Polio  
Smallpox  
DTP

1983

24

DOSES

DTP (2 mos)  
OPV (2 mos)  
DTP (4 mos)  
OPV (4 mos)  
DTP (6 mos)  
MMR (15 mos)  
DTP (18 mos)  
OPV (18 mos)  
DTP (4 years)  
OPV (4 years)  
Td (15 years)

2019

72

DOSES

Influenza (pregnancy) DTaP (18 mos)  
TDaP (pregnancy) Influenza (18 mos)  
Hep B (birth) Hep A (18 mos)  
Hep B (2 mos) Influenza (30 mos)  
Rotavirus (2 mos) Influenza (42 mos)  
DTaP (2 mos) DTaP (4 yrs)  
HiB (2 mos) IPV (4 yrs)  
PCV (2 mos) MMR (4 yrs)  
IPV (2 mos) Varicella (4 yrs)  
Rotavirus (4 mos) Influenza (5 yrs)  
DTaP (4 mos) Influenza (6 yrs)  
HiB (4 mos) Influenza (7 yrs)  
PCV (4 mos) Influenza (8 yrs)  
IPV (4 mos) Influenza (9 yrs)  
Hep B (6 mos) HPV (9 yrs)  
Rotavirus (6 mos) Influenza (10 yrs)  
DTaP (6 mos) HPV (10 yrs)  
HiB (6 mos) TDaP (12 yrs)  
PVC (6 mos) Influenza (12 yrs)  
IPV (6 mos) Meningococcal (12 yrs)  
Influenza (6 mos) Influenza (13 yrs)  
Influenza (7 mos) Influenza (14 yrs)  
HiB (12 mos) Influenza (15 yrs)  
PCV (12 mos) Influenza (16 yrs)  
MMR (12 mos) Meningococcal (16 yrs)  
Varicella (12 mos) Influenza (17 yrs)  
Hep A (12 mos) Influenza (18 yrs)

*First Do No Harm*

In 1986, pharmaceutical companies producing vaccines were given full federal protection via the National Childhood Vaccine Injury Act (NCVIA) passed by Congress, due to lawsuits resulting from vaccine injury or death. If vaccines are so safe, why did the manufacturers need a law to protect themselves from liability?

After this law, vaccines became **HIGHLY** profitable. There are almost 300 vaccines in development, and mandatory vaccine laws for children and **ADULTS** are enacted in most states. **OVER 4 BILLION DOLLARS** has been paid out in vaccine injury compensation since 1986--and that is only a fraction of the actual injuries. The CDC has only tested the MMR and Thimerosal for a link to autism. **The remaining 15 vaccines and 37 common ingredients remain untested for links to autism.**

**The US gives 2 to 3X more vaccines to children than most developed countries.** Yet the US has skyrocketing rates of childhood diseases **NOT** found in other countries asthma, diabetes, food allergies, leukemia, developmental delays, tics, ADHD, autism, as well as Alzheimer's in adults.

**"The key elements of the entire [childhood vaccine] schedule: the number, frequency, timing, order, and age of administration of vaccinations has never been systematically examined in research studies."**

**- a 2013 study by Institute of Medicine (IOM)**
